No Sample Left Behind!

COURIER SOFTWARE

ROUTE • TRACK • MANAGE

MCE is a medical courier software & logistics system designed for routing, specimen tracking, & managing couriers in real time. Prevent missing specimens, verify all stops are made, optimize routes and efficiency. A system designed specifically for lab and hospital couriers that is easy to implement and easy to use. See why medical couriers nationwide rely on MCE!

How MCE® Works
Medical Courier Elite®

Administrators Website

With advance management tools, administrators can:

- Run optimized routes for couriers
- Send STAT dispatches to couriers
- See courier locations in real time
- Verify couriers are on schedule or if they have missed stops
- Search for barcoded specimens
- See specimens that are in route
- Run Reports

Courier Mobile App

Through an easy to use mobile app, couriers can:

- See daily routes & get directions
- See special notes about stops
- Track specimens & supplies from pickup to delivery
- Track specimen transfers between hubs or couriers
- Record notes about their visit & take pictures of empty lock boxes to verify no sample was left behind.
- Send customers receipts of scanned specimens
- Capture customer signatures at each stop
- Be alerted to any specimens still in their possession

ZEBRA TC27

Customer Access

Grant customers access to:

- Create STAT dispatch requests in MCE
- Request courier pickups for a future time
- Create specimen list for courier verification of pickup
- See the delivery status of specimen list
- Send messages to their courier
- Run reports
